EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alexander J. Burke, Reg. No. 40,425, on Tuesday, July 29, 2008.

2. Please amend the claims as follows:

18. (Currently Amended) A user interface system stored on a computer-readable medium enabling a user to reduce workload of a server to support maintenance of said server, comprising: a display generator for initiating generation of data representing at least one display image, enabling user entry of a command changing a destination address stored in a particular server from a first destination address to a second destination address without accessing a remote switch processor communicating with said particular server, said change to said second destination address being used to identify said particular server is unavailable for initiation of new operation sessions of applications and in response to failure of said command indicating said failure by an indicator in said at least one display image.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: In interpreting the claims, in light of the specification and the applicant's amendments and remarks filed 06/16/2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach a failure response as a result of directly accessing a server behind a switch processor to change a destination file name as required by the claims of the present application. In contrast to the prior art, the present invention teaches receiving a response indicating the failure of a data access request at a particular server, redirecting the data access request to another server other than said particular server, and wherein the response indicating the failure of the data access request at the particular server results from a change of destination address stored in said particular server. This change is

Art Unit: 2145

made without accessing the switch processor which the servers reside behind. The limitations of the independent claims are allowable subject matter over the prior art, in light of the specification.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Claims 1-18 are allowed.

Conclusion

Any inquiry concerning this communication should be directed to JASON D. CARDONE at telephone number (571)272-3933.
